A man in a dark suit and light blue shirt is standing and talking on a white smartphone. He is holding a large document or blueprint in his left hand. In the foreground, there is a glass desk with a laptop, a coffee cup, a rolled-up document, and a small potted plant. The background is a modern office with large windows.

About Us

ECOEAST Limited was created to provide advisory, sustainable solutions and technical assistance in addressing the existing and emerging challenges our environment and mankind face.

We are a consultancy equipped with knowledge in the assessment and management of environmental and social risks and impacts associated with development projects. Our expertise also extends to natural resource management, renewable energy, climate change, environmental and social governance.

Vision

We endeavor to assist businesses, governments, and communities in understanding the true value of environmental management and protection, biodiversity and sustainability. Our goal is to forge strong and lasting relationships with our clients, working with them to leave behind a landscape that is better both for humans, animals and for nature.

Mission

Our mission is to use our vast field experience and apply it to environmental issues, using a business-oriented approach. Gathering good data is indispensable, and accurate interpretation of it is crucial to key decision making. We vow to do both. We strive to be a strong, multi-disciplinary, collaborative team with expertise in environmental science, social development, project and business management, and corporate philanthropy, capable of seeking creative cost-effective solutions for our clients' projects.

Services

ECOEAST Limited provides a large range of services to its clients. Our services include:

- Corporate Sustainability and Climate Change
- Environmental and Social Assessments
- Natural Resources Management
- Renewable Energy
- Technical Assistance in Implementation of International Conventions on the Environmental and Social Development
- Environmental Media Sampling and Analysis

Corporate Sustainability and Climate Change

Climate change is one of the most critical issues that emerges in the debate on sustainability. Voluntary business initiatives, in the form of corporate social responsibility practices, can play a key role in promoting sustainable development, whose effectiveness depends on the responsible involvement of actors operating in the political, economic and societal sphere.

Our Corporate Sustainability and Climate Change practice helps organizations plan, source, deliver, finance and measure the wider impact of products and services. We are helping to future-proof business by making them more resilient, agile and sustainable.

ECOEAST provides guidance on a wide variety of issues, working with clients from the corporate, private equity and public sector. We are specialists in how organizations spot risks and harness the opportunities

Environmental and Social Assessments

The identification of adverse environmental and social risks and impacts of proposed developments is best practice towards avoiding, reducing mitigating or compensating for such impacts. While our ESIA's address projects with risks and impacts that are widespread, have large magnitude, irreversible, long-term, direct and indirect, our ESMPs address risks and impacts that are localized, site-specific, short-term and reversible. We ensure applicability of the World Bank's Environmental and Social Standards (ESSs) 1 & 10. Other Environmental Assessment services we offer include:

- Environmental and Social Due Diligence
- Environmental and Social Risk Assessment
- Environmental and Social Auditing
- Environmental and Social Screening
- Environmental and Social Scoping
- Environmental and Social Commitment Plans
- Sectoral Environmental and Social Assessments
- Strategic Environmental and Social Assessments
- Sustainability Reporting
- Environmental and Social Assessment training and Capacity Building

Natural Resources Management

Natural resources provide fundamental support to life and economic processes. Soils are the foundation of agriculture, which in turn is the basic building block in the livelihoods of all people. Forests help protect water sources, reduce the risks of natural disasters such as landslides and flooding, are home to at least 80% of remaining terrestrial biodiversity, and are a major carbon sink that mitigates climate change. Water is essential for the sustenance and health of humankind and indeed of all species, and so are many other terrestrial and marine natural resources. Our services here include:

- 1 Water resources assessment and management
- 2 Land-use change and Landscape dynamics
- 3 Human-wildlife conflict and Bushmeat Management
- 4 Ecosystem services surveys & analysis

Renewable Energy

We help companies, governments and Project Management Units involved in renewable energy projects apply environmental and social governance (ESG) in the planning, design, development and implementation activities. Additionally, we seek to identify sustainable renewable energy innovations and identify marketing and business opportunities.

Technical Assistance in Implementation of International Conventions on the Environmental and Social Development

Several international conventions on the environment, social development and labour laws exist and are ratified in several countries. Our services include preparation of National Action Plans (NAPs), guidelines programs and implementation of these for governments.

We are well skilled in the preparation and development of frameworks, management plans and donor-recipient environmental and social commitment plans commitment plans

Environmental Media Sampling and Analysis

Our environmental sampling, analytical and monitoring services is dedicated to providing our clientele a competitive advantage by the routine provision of litigation quality analytical data. Achievement is attained through a continual process of quality improvement and advancement in all areas of our performance. We focus on servicing proponents of development projects, not only to provide reliable data, but to help our them meet their goals in terms of project environmental and social performance, sustainability, profitability and timely completion.

Our clients know that ECOEAST, will allow them to run their projects more efficiently, save labor hours, and provide data and information when they need to achieve environmental and social compliance with project implementation especially where environmental sampling is required.
